

TIONGE HUNGA

DATA ANALYST | DATA MANAGEMENT | MONITORING & EVALUATION

Lilongwe, Malawi | +265 99 004 8448 | tiongehu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data professional with nearly five years of experience in data management, monitoring and evaluation, data quality assurance, reporting and data analysis. Experienced in validating, cleaning, managing and analysing real world data to support reporting, evidence based decision making and demonstration of programme impact. Skilled in data analysis, data visualization, dashboard development and Microsoft Excel, Power BI, Google Looker Studio and Google Sheets.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Transformation, Data Validation, Data Visualization, KPI Reporting, Dashboard Development

Data Management & Quality: Database Management, Data Quality Assurance (DQA), Data Completeness, Data Integrity, Record Management

Monitoring & Evaluation: Programme Monitoring, Data Collection, Data Collection Tools Development, Data Analysis, Data Quality Assessment, Reporting

Tools & Technologies: Microsoft Excel, Power BI, Google Looker Studio, Google Sheets

Professional Skills: Attention to Detail, Analytical Thinking, Communication, Organisation, Problem Solving, Time Management

PROFESSIONAL EXPERIENCE

Monitoring & Evaluation Assistant | Lilongwe Wildlife Trust, Lilongwe, Malawi | Jan 2025 – Present

- **Translate data into actionable insights** by preparing and analysing datasets for internal and external reports, enabling management and donors to assess programme progress and impact.
- **Improve data accuracy and reliability** by quality assuring a 900+ record court monitoring database, reviewing 15 to 20 active records monthly across three regions and coordinating with Court Monitors to resolve discrepancies and missing information.
- **Strengthen data quality and reporting efficiency** by conducting weekly reviews of three departmental databases containing 750+ records across media monitoring, programme results and pangolin monitoring.
- **Generate evidence of programme progress, results and impact** through onsite monitoring, data collection and analysis, informing evidence based decision making and demonstrating results to donors.
- **Support organisational visibility and stakeholder engagement** by representing the organisation at national environmental events and engaging stakeholders.
- **Improved visitor data quality and analysis** by redesigning the Google Sheets data collection tool, restructuring columns for clear and consistent recording of visit date, time, day and visitor group and introducing dropdowns and appropriate data formats to reduce input errors and support reliable analysis.
- **Improved rehabilitation data quality and reporting efficiency** by redesigning the Google Sheets database, adding relevant data fields, dropdowns and date validation rules to improve data completeness and prevent incorrect entries; developing a summary tab for quick KPI reporting; and linking the database to a dashboard to visualize trends in animal intakes, deaths and releases over time.

Data Entry Clerk | Lilongwe Wildlife Trust, Lilongwe, Malawi | Oct 2021 – Dec 2024

- **Ensured data accuracy and integrity** by verifying the completeness, consistency and accuracy of data collection forms before data entry and followed up with Court Monitors to resolve discrepancies at source.
- **Strengthened data quality** through onsite Data Quality Assurance (DQAs), identifying data inconsistencies and gaps and verifying information against source records.
- **Supported donor reporting** by preparing datasets, conducting basic data analysis and organising information for internal and external reporting.
- Maintained 2,00+ data records in Microsoft Access, ensuring structured, accurate and up to date information was available for analysis and reporting.
- Maintained 200+ active case records in a specialised database, continuously updating information throughout the case lifecycle to support accurate case tracking.
- **Improved programme documentation and data accessibility** by organising and maintaining supporting records, including photographs, reports and case-related files.

PROJECTS

Pangolin Monitoring Dashboard | Looker Studio | Professional Project

- Developed a monitoring dashboard to track pangolin weight changes during rehabilitation and support animal health monitoring.
- Visualized weight trends to provide insights for programme monitoring and reporting.

Lilongwe Wildlife Centre Visitor Analytics Dashboard | Looker Studio | Professional Project

- Analysed visitor patterns by day, time and visitor group to identify peak periods and support management decisions around opening hours, staffing and visitor operations.
- Presented visitor trends through a dashboard to support operational planning and decision making.

Superstore Sales Performance Dashboard | Microsoft Excel | Personal Project

- Analysed sales performance across customer segments, categories, products, cities, regions and time, identifying key sales patterns and high performing segments and categories.
- Built an interactive Excel dashboard using PivotTables, PivotCharts, KPI cards and slicers to communicate sales trends and business performance.

Diabetes Patient Analytics Dashboard | Microsoft Excel | Power Query | Power Pivot | DAX | Personal Project

- Cleaned and transformed healthcare data using Power Query and structured related datasets using Power Pivot.
- Developed analytical measures and an interactive dashboard to explore diabetes related patterns.

HR Employee Attrition Analysis Dashboard | Power BI | Personal Project

- Cleaned and analysed employee data and developed an interactive dashboard to examine workforce attrition and retention patterns.
- Created KPI measures and visualizations and translated findings into employee retention recommendations.

VIRTUAL JOB SIMULATIONS

BCG X – Introduction to Data for Decision Makers | Boston Consulting Group (BCG) / Forage | 2026

- Completed a practical data analytics simulation focused on evaluating multi-channel advertising campaign performance for a hypothetical client.
- Analysed campaign and channel performance, comparing sales and customer conversions to identify the strongest combination.
- Created data visualizations and recommended prioritizing Campaign A through Email based on its strongest sales and conversion performance.

EDUCATION

Bachelor of Science in Computer Science

DMI St. John the Baptist University | 2017 to 2021

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Data Analyst in Power BI — DataCamp, 2026
- Data Literacy Professional — DataCamp, 2026
- AI Fundamentals — DataCamp, 2026
- Data Analysis with Excel Power Tools — DataCamp, 2026
- Excel Fundamentals — DataCamp, 2026
- From Data Collection to Data Use — Philanthropy University / FHI360, 2025
- Planning for Monitoring & Evaluation — Philanthropy University / FHI360, 2024
